

### **Objective:**

By utilizing an equity lens, a school board aims to (a) provide a common vocabulary and protocol for evaluating policies, programs, practices and decisions for equity and (b) produce policies, programs, practices which result in more equitable outcomes.

### **Procedure:**

For any policy, program, practice or decision, consider the following five questions:

# 1

Who are the under-represented groups (federal subgroups) affected by this policy, program, practice or decision? And what are the potential impacts on these groups?

# 2

Does this policy, program, practice or decision worsen existing disparities or produce other unintended consequences?

# 3

How have you intentionally involved stakeholders who are also members of the communities affected by this policy, program, practice or decision? Can you validate your assessments in (1) and (2)?

# 4

What are the barriers to more equitable outcomes? (e.g. mandated, political, emotional, financial, programmatic or managerial)

# 5

How will you (a) mitigate the negative impacts and (b) address the barriers identified above?
